

Dedicated to Excellence

Ox Close Primary School

Data Protection Policy

I. Aims & Objectives

The aim of this policy is to provide a framework to enable staff, parents and pupils to understand:

- the law regarding personal data
- how personal data should be processed, stored, archived and disposed of
- how staff, parents and pupils can access personal data.

I.1. It is a statutory requirement for all schools to have a Data Protection Policy:

(<http://www.education.gov.uk/schools/toolsandinitiatives/cuttingburdens/a00201669/statutory-policies-for-schools>)

I.2. Data Protection Principles

Article 5 of the GDPR sets out that personal data shall be:

- a) processed lawfully, fairly and in a transparent manner in relation to individuals;
- b) collected for specified, explicit and legitimate purposes and not further processed in a manner that is incompatible with those purposes; further processing for archiving purposes in the public interest, scientific or historical research purposes or statistical purposes shall, subject to measures respecting the principle of 'data minimisation', not be considered to be incompatible with the initial purposes;
- c) adequate, relevant and limited to what is necessary in relation to the purposes for which they are processed;
- d) accurate and, where necessary, kept up to date; every reasonable step must be taken to ensure that personal data that are inaccurate, having regard to the purposes for which they are processed, are erased or rectified without delay;
- e) kept in a form which permits identification of data subjects for no longer than is necessary for the purposes for which the personal data are processed; personal data may be stored for longer periods insofar as the personal data will be processed solely for archiving purposes in the public interest, scientific or historical research purposes or statistical purposes subject to implementation of the appropriate technical and organisational measures required by the GDPR in order to safeguard the rights and freedoms of individuals, and again subject to the 'data minimisation' principle; and
- f) Processed in a manner that ensures appropriate security of the personal data, including protection against unauthorised or unlawful processing and against accidental loss, destruction or damage, using appropriate technical or organisational measures.

In addition, article 5(2) requires that the controller shall be responsible for, and be able to demonstrate, compliance with the principles. In effect the school, as the 'data controller', needs to be able to show that its policies and systems comply with requirements of GDPR.

2. Lawful Basis for processing data

GDPR stipulates that there must be a lawful basis for processing data, and that for special category data an additional condition has to be met. The vast majority of information that schools collect and process is required to enable the school to perform tasks carried out in the public interest or in the exercise of official authority vested in the school, as the data controller. This is the main lawful basis for processing data that a school is likely to rely on.

There are other bases that may be available, such as a specific legal obligation applying to the data controller that makes the processing necessary. Your legal advisor will be able to identify individual statutes if required.

2.1 Age

Children under the age of 13 are not considered able to give consent to process data or to directly access the rights of a data subject, so parents or guardians do this on their behalf. Over the age of 13, this responsibility is transferred to the child and parents will not have responsibility for their child's data. (This is subject to the Data Protection Bill becoming law. The 'default' age under the GDPR is 16.)

2.2 Consent

If there is a lawful basis for collecting data, then consent to collect data is not required. (An employee could not opt to withhold an NI number for example.) However, a privacy notice, which explains to data subjects (or the parents of the data subject if under the age of 13), will be required. This explains the lawful basis for processing the data, and also explains to the individual their rights.

Parents/Carers or children over the age of 13 will need to give consent when there is not a legal reason for processing, for instance for images used in school publicity or social media feeds. The consent will need to be transparent, revocable, and will need to be on an "Opt-in" basis.

RIGHTS

The GDPR creates some new rights for individuals and strengthens some existing ones. It provides for the following rights:

1. The right to be informed
2. The right of access
3. The right to rectification
4. The right to erasure
5. The right to restrict processing
6. The right to data portability
7. The right to object
8. Rights in relation to automated decision making and profiling.

For "privacy notices" covering the right to be informed, please see section 5 below.

Different rights attach to different lawful bases of processing:

	Right to erasure	Right to portability	Right to object
Vital Interests	✓	✗	✗
Legal Obligation	✗	✗	✗
Public Task	✗	✗	✓
Legitimate Interests	✓	✗	✓
Contract	✓	✓	✗
Consent	✓	✓	✗ but right to withdraw consent

The right to erasure

GDPR includes a right to erasure – but this is not an absolute right and does not necessarily override the lawful basis for continuing to hold data. Your legal advisor will be able to support with information about which data can continue to be legally held if a data subject asks to be ‘forgotten’. Schools’ data management systems such as SIMS will begin to improve their functionality to either delete or anonymise personal data when appropriate.

It will be seen from the table above that where a school relies on either a ‘legal obligation’ or a ‘public task’ basis for processing (see above) there is no right to erasure – however this does not mean the data will never be erased. It will still not be retained for any longer than necessary, in accordance with statutory requirements and/or the school’s data retention guidelines.

3. Data Types

Not all data needs to be protected to the same standards - the more sensitive or potentially damaging the loss of the data is, the better it needs to be secured. There is inevitably a compromise between usability of systems and working with data. In a school environment staff are used to managing risk, for instance during a PE or swimming lesson where risks are assessed, controlled and managed. A similar process should take place with managing school data. GDPR defines different types of data and prescribes how it should be treated.

The loss or theft of any Personal Data is a “Potential Data Breach” which could result in legal action against the school. The loss of sensitive, or “special category”, personal data is considered much more seriously and the sanctions may well be more punitive.

3.1. Personal data

The school will have access to a wide range of personal information and data. The data may be held in a digital format or on paper records. Personal data is defined as any combination of data items that identifies an individual and provides specific information about them, their families or circumstances.

This will include:

- Personal information about members of the school community – including pupils / students, members of staff and parents / carers e.g. names, addresses, contact details, legal guardianship contact details, disciplinary records
- Curricular / academic data e.g. class lists, pupil / student progress records, reports, references
- Professional records e.g. employment history, taxation and national insurance records, appraisal records, disciplinary records and references
- Any other information that might be disclosed by parents / carers or by other agencies working with families or staff members.

3.2. Special Category Data

“Special Category Data” are data revealing a person’s racial or ethnic origin, political opinions, religious or philosophical beliefs, or trade union membership, and the processing of genetic data, biometric data, data concerning a person’s health or sexual life is prohibited except in special circumstances.

This is because special category data is more sensitive, and so needs more protection.

In a school the most likely special category data is likely to be:

- information on the racial or ethnic origin of a pupil or member of staff
- information about the sexuality of a child, his or her family or a member of staff
- medical information about a child or member of staff (SEND)
- (Some information regarding safeguarding will also fall into this category.)staffing e.g. Staff Trade Union details

3.3. Other types of Data not covered by the act

This is data that does not identify a living individual and, therefore, is not covered by the remit of the DPA - this may fall under other ‘access to information’ procedures. This would include Lesson Plans (where no individual pupil is named), Teaching Resources, and other information about the school which does not relate to an individual. Some of this data would be available publicly (for instance the diary for the forthcoming year), and some of this may need to be protected by the school (if the school has written a detailed scheme of work that it wishes to sell to other schools). Schools may choose to protect some data in this category but there is no legal requirement to do so.

The ICO provides additional information on their website. See http://ico.org.uk/for_organisations/data_protection/the_guide/key_definitions

4. Responsibilities

The Headteacher and Governing Body are responsible for Data Protection, they should appoint a Data Protection Officer to manage data.

4.1. Risk Management – Roles: *Data Protection Officer*

The school should have a nominated member of staff responsible for the management of data protection.

According to the ICO the minimum role will include:

- to inform and advise the organisation and its employees about their obligations to comply with the GDPR and other data protection laws
- to monitor compliance with the GDPR and other data protection laws, including managing internal data protection activities, advise on data protection impact assessments; train staff and conduct internal audits
- to be the first point of contact for supervisory authorities and for individuals whose data is processed (employees, customers etc.).

The Data Protection Officer at Ox Close Primary is Miss Anna Bowden (Deputy Headteacher).

4.2. Risk management - Staff and Governors Responsibilities

- Everyone in the school has the responsibility of handling personal information in a safe and secure manner.
- Governors are required to comply fully with this policy in the event that they have access to personal data, when engaged in their role as a Governor.

5. Legal Requirements

5.1. Registration

The school must be registered as a Data Controller on the Data Protection Register held by the Information Commissioner and each school is responsible for their own registration: http://ico.org.uk/for_organisations/data_protection/registration

5.2. Information for Data Subjects (Parents, Staff): **PRIVACY NOTICES**

In order to comply with the fair processing requirements of the DPA, the school **must** inform parents / carers of all pupils / students and staff of the data they collect, process and hold on the pupils / students, the purposes for which the data is held, the legal basis for holding it and the third parties (e.g. LA, DfE, etc) to whom it may be passed. The privacy notice will also need to set out the data subjects' rights under the GDPR. This privacy notice will be passed to parents / carers through a letter. More information about the suggested wording of privacy notices can be found on the DfE website: <http://www.education.gov.uk/researchandstatistics/datatdatam/a0064374/pn>

New privacy notices should be issued to all 'data subjects' by May 2018 even if the data subject has previously received a similar notice. This is because of the new rights in the GDPR that people should be informed about.

6. Transporting, Storing and Disposing of personal Data

6.1. Information security - Storage and Access to Data

The more sensitive the data the more robust the security measures will need to be in place to protect it.

6.1.1. Technical Requirements

- The school will ensure that ICT systems are set up so that the existence of protected files is hidden from unauthorised users and that users will be assigned a clearance that will determine which files are accessible to them. Access to protected data will be controlled according to the role of the user. Members of staff will not, as a matter of course, be granted access to the whole management information system.
- Personal data may only be accessed on machines that are securely password protected. Any device that can be used to access data must be locked if left (even for very short periods) and set to auto lock if not used for five minutes.
- All storage media must be stored in an appropriately secure and safe environment that avoids physical risk, loss or electronic degradation.
- Personal data can only be stored on school equipment (this includes computers and portable storage media (where allowed)). Private equipment (ie owned by the users) must not be used for the storage of personal data.
- The school / academy has clear policy and procedures for the automatic backing up, accessing and restoring all data held on school systems, including off-site backups. (The school will need to set its own policy, relevant to its physical layout, type of ICT systems etc. Schools need to be aware of a significantly higher risk of a data loss, and should ensure that they can recover from a cyber-attack.)

6.1.2. Portable Devices

When personal data is stored on any portable computer system, USB stick or any other removable media:

- the data must be encrypted and password protected
- the device must be password protected (many memory sticks / cards and other mobile devices cannot be password protected)
- the data must be securely deleted from the device, in line with school policy (below) once it has been transferred or its use is complete
- the school will need to set its own policy as to whether data storage on removal media is allowed, even if encrypted – some organisations do not allow storage of personal data on removable devices
- *We would advise that...* Only encrypted removable storage purchased by the school is allowed to be used on school computers.

6.1.3. Passwords

- All users will use strong passwords which must be changed regularly. User passwords must never be shared. It is advisable NOT to record complete passwords, but prompts could be recorded.

6.1.4. Images

- Images of pupils (*Change as appropriate* will not be processed off site / will only be processed and transported by use of.. and permission for this will be obtained in the privacy notice or other photographic permission notice.)
- Images will be protected and stored in a secure area.

6.1.5. Cloud Based Storage

- The school has clear procedures for the use of “Cloud Based Storage Systems” (for example Dropbox, Google Apps and Onedrive) and is aware that data held in remote and cloud storage is still required to be protected in line with the Data Protection Act. The school will ensure that it is satisfied with controls put in place by remote / cloud based data services providers to protect the data. See advice from the DfE below:-
<https://www.gov.uk/government/publications/cloud-software-services-and-the-data-protection-act>

6.2. Third Party data transfers

As a Data Controller, the school / academy is responsible for the security of any data passed to a “third party”. Data Protection clauses will be included in all contracts where data is likely to be passed to a third party as well as data processing agreements.

http://ico.org.uk/for_organisations/data_protection/topic_guides/data_sharing

6.3. Retention of Data

- The guidance given by the Information and Records Management Society – [Schools records management toolkit](#) will be used to determine how long data is retained.
- Personal data that is no longer required will be destroyed and this process will be recorded.

6.4. Systems to protect data

6.4.1. Paper Based Systems

- All paper based personal data will be protected by appropriate controls, for example:
 - Paper based safeguarding chronologies will be in a locked cupboard when not in use
 - Class Lists used for the purpose of marking may be stored in a teacher’s bag.
- Paper based personal information sent to parents (will be checked by ..., before the envelope is sealed).

6.4.2. School Websites

- Uploads to the school website will be checked prior to publication, for instance:

- to check that appropriate photographic consent has been obtained
- to check that the correct documents have been uploaded.

6.4.3. E-mail

E-mail cannot be regarded on its own as a secure means of transferring personal data.

- Where technically possible all e-mail containing sensitive information will be encrypted by (... *for instance* ... by attaching the sensitive information as a word document and encrypting the document / compressing with 7 zip and encrypting. The recipient will then need to contact the school for access to a one-off password) or
- The use of Egress (Secure e-mail system) allows for secure communication.

7. Data Sharing

The school is required by law to share information with the LA and DfE. Further details are available at:

<https://www.gov.uk/guidance/data-protection-how-we-collect-and-share-research-data>

Durham LSCB also provides information on information sharing at:

<http://www.durham-lscb.org.uk/wp-content/uploads/sites/29/2016/06/Guide-for-professionals-on-information-sharing.pdf>

Schools should ensure that, where special category data is shared, it is transmitted securely for instance by secure e-mail such as Egress or is transferred in tamper proof envelopes securely delivered to the recipient.

8. Data Breach – Procedures

On occasion, personal data may be lost, stolen or compromised. The data breach includes both electronic media and paper records, and it can also mean inappropriate access to information.

- In the event of a data breach the data protection officer will inform the head teacher and chair of governors.
- The school will follow the procedures set out in Appendix 5.

9. Policy Review Reviewing:

This policy will be reviewed, and updated if necessary every two years or when legislation changes. GDPR is due to be implemented on 25th May 2018 and this policy is in line with the new regulations..

Adopted by the Governing Body at the Summer 2018 meeting.

The Data Protection Officer is Anna Bowden (Deputy Headteacher).

Appendix 2 - Privacy Notices

2.1 Parent / Carer Privacy Notice

This privacy notice explains how we collect, store and use personal data about pupils. We, Ox Close Primary School, are the 'data controller' for the purposes of data protection law.

Our data protection officer is Anna Bowden (Deputy Headteacher).

Who we are and what we do

We are Ox Close Primary School, Ox Close Crescent, Spennymoor, Co. Durham, DL16 6RU. We are a maintained primary school for children ages 4 – 11 years old. Our local authority is Durham County Council.

The personal data we collect and hold

We hold personal data about pupils and their parents or carers. This is in order to support teaching and learning, to provide pastoral care and to assess how the school is performing. We may also receive data about pupils from other organisations including, but not limited to, other schools, local authorities, health care providers and the Department for Education.

Personal data that we may collect, use, store and share (when appropriate) about parents/cares and pupils includes, but is not restricted to:

- Contact details, contact preferences, date of birth, identification documents, National Insurance number.
- Results of internal assessments and externally set tests
- Pupil and curricular records
- Characteristics, such as ethnic background, eligibility for free school meals, or special educational needs
- Exclusion information
- Details of any medical conditions, including physical and mental health
- Attendance information
- Safeguarding information
- Details of any support received, including care packages, plans and support providers
- Photographs

Why we use this data

We use this data to:

- Support pupil learning
- Monitor and report on pupil progress
- Provide appropriate pastoral care
- Protect pupil welfare
- Assess the quality of our services (including monitoring staff performance)
- Administer admissions waiting lists
- Carry out research
- Comply with the law regarding data sharing
- Identify pupil eligibility for Free School Meals and Pupil Premium funding

Our legal basis for using this data

We collect and use personal data based on performing a public task (educating children).

On some occasions, we may ask for consent to process data when its use is optional. On those occasions, consent can be withdrawn at any time. We will make this clear when we ask for consent, and explain how consent can be withdrawn.

Collecting this information

We collect / obtain data from pupils, parents, carers, teachers and other professionals where relevant (e.g. G.P, hospital, social workers etc.)

How we store this data

We keep personal information about pupils and their parents/guardians while they are attending our school. We may also keep it beyond their attendance at our school if this is necessary in order to comply with our legal obligations. We will only retain the data we collect for as long as is necessary. This would be to satisfy the purpose for which it has been collected, in accordance with our data retention policy. Please contact us if you would like further details on this policy.

The security of data and information is important to us. This is why we follow a range of security policies and procedures to control and safeguard access to and use of your personal information. This includes both physical and technical security and integrity of all data.

Data sharing

We do not share any of this data with any other organisation without your permission, except where the law requires it. We are required to provide pupil data to central government through the Department for Education and the Education Funding Agency. Where it is necessary to protect a child, the school will also share data with the Local Authority Children's Social Services, medical professional and/or the Police.

We will share information with the local authority to check eligibility for free school meals.

We do not transfer personal data to countries outside the European Economic Area.

Parents and pupils' rights regarding personal data

Individuals have a right to make a '**subject access request**' to gain access to personal information that the school holds about them. This includes access to their child's educational record. This should be made in writing or by e-mail to oxcloseprimary@durhamlearning.net. The school will respond within a 15 school days timescale.

Parents/Carers can make a request with respect to their child's data where the child is not considered mature enough to understand their rights over their own data (usually under the age of 16), or where the child has provided consent.

Parents also have the right to make a subject access request with respect to any personal data the school holds about them.

If you make a subject access request, we will:

- Give you a copy of the information in an intelligible form
- Give you a description of the data we hold
- Tell you why we are holding and processing it, and how long we will keep it for
- Explain where we got it from, if not from you or your child
- Tell you who it has been, or will be, shared with
- Let you know whether any automated decision-making is being applied to the data, and any consequences of this
-

Individuals also have the right for their personal information to be transmitted electronically to another organisation in certain circumstances.

If we cannot provide information to you, we will give you a description of the information we hold and the reason why it cannot be disclosed to you at the time of your request.

Other rights

Individuals have rights regarding how their personal data is used and kept safe, including the right to:

- Object to the use of personal data if it would cause, or is causing, damage or distress
- Prevent it being used to send direct marketing
- Object to decisions being taken by automated means (by a computer or machine, rather than by a person)
- In certain circumstances, have inaccurate personal data corrected, deleted or destroyed, or restrict processing
- Claim compensation for damages caused by a breach of the data protection regulations

To exercise any of these rights, please contact our data protection officer.

Complaints

We take any complaints about our collection and use of personal information very seriously.

If you think that our collection or use of personal information is unfair, misleading or inappropriate, or have any other concern about our data processing, please raise this with us in the first instance.

To make a complaint, please contact our data protection officer.

Alternatively, you can make a complaint to the Information Commissioner's Office:

- Report a concern online at <https://ico.org.uk/concerns/>
- Call 0303 123 1113
- Or write to: Information Commissioner's Office, Wycliffe House, Water Lane, Wilmslow, Cheshire, SK9 5AF

Contact us

If you have any questions, concerns or would like more information about anything mentioned in this privacy notice, please contact our data protection officer:

Email Address: a.bowden102@durhamlearning.net

2.2 Staff Privacy Notice

This privacy notice explains how we collect, store and use personal data about staff members. We, Ox Close Primary School, are the 'data controller' for the purposes of data protection law.

Our data protection officer is Anna Bowden (Deputy Headteacher).

Who we are and what we do

We are Ox Close Primary School, Ox Close Crescent, Spennymoor, Co. Durham, DL16 6RU. We are a maintained primary school for children ages 4 – 11 years old. Our local authority is Durham County Council.

The personal data we collect and hold

We hold personal data about staff to support their employment and professional development, and to assess how the school is performing. We may also receive data about staff from previous employers, HR and occupational health workers.

Personal data that we may collect, use, store and share (when appropriate) about staff includes, but is not restricted to:

- Contact details, contact preferences, date of birth, identification documents
- Professional development records
- Bank details
- Maternity/paternity pay information
- Health information
- Performance management documentation
- Characteristics, such as ethnic background, disability etc
- Sickness absence records
- Details of any professional support received
- Photographs/videos

Why we use this data

We use this data to:

- Support you in your professional roles
- Monitor and report on school improvement and self-evaluation
- Provide appropriate pastoral care
- Protect pupil welfare
- Ensure that the information we hold about you is kept up to date
- To share with agencies such as payroll and pensions

Our legal basis for using this data

We collect and use personal data on the basis of performing a public task (educating children).

On some occasions we may ask for consent to process data when its use is optional. On those occasions consent can be withdrawn at any time. We will make this clear when we ask for consent, and explain how consent can be withdrawn.

Collecting this information

We collect data from application forms, paper forms, online information, communication with yourself, information received from a third party (eg. referees, colleagues, agencies)

How we store this data

We keep personal information about staff while they are working at our school. We may also keep it beyond their time at our school if this is necessary in order to comply with our legal obligations.

We will only retain the data we collect for as long as is necessary. This would be to satisfy the purpose for which it has been collected in accordance with our data retention policy. Please contact us if you would like further details on this policy.

The security of data and information is important to us. This is why we follow a range of security policies and procedures to control and safeguard access to and use of your personal information. This includes both physical and technical security and integrity of all data.

Examples of our security include:

- Encryption, meaning that information is hidden so that it cannot be read without access knowledge (such as a password). This is done with a secret code or what's called a 'cypher'. The hidden information is said to then be 'encrypted';
- Controlling access to systems and networks allows us to stop people who are not allowed to view your personal information from getting access to it;
- Training for our staff allows us to make them aware of how to handle information and how and when to report when something goes wrong;
- Regular testing of our technology and ways of working including keeping up to date on the latest security updates (commonly called patches);

How long we keep your data for

This ranges from months for some records to decades for more sensitive records.

For example

- applications for recruitment will be kept for 1 year,
- your personnel record will be maintained for 25 years after you leave employment

Data sharing

We may share your personal information where we have a statutory obligation to do so, such as for the purposes of the prevention or detection of crime, for legal proceedings, or where you have requested us to share information, such as childcare vouchers, pensions, mortgage applications etc.

Some examples of who we share information with include:-

HMRC (Her Majesty's Revenue & Customs)

DBS (Disclosure & Barring Service)

Pensions schemes

If you would like confirmation of who we do share information with please contact us.

We do not process your personal information outside the EEC.

At no time will your information be passed to organisations external to us, or our partners for marketing or sales purposes, or for any other commercial use without your prior express consent.

Your information rights

Your Information Rights are set out in the law. Subject to some legal exceptions, you have the right to:

- Have any inaccuracies corrected;
- Have your personal data erased;
- Place a restriction on our processing of your data;
- Object to processing; and
- Request your data to be ported (data portability).

To learn more about these rights please see the ICO website.

To exercise any of these rights please contact the relevant service in the first instance.

You also have the right to request a copy of the personal information that the school holds about you. To do this, please ask the Data Protection Officer, Miss Anna Bowden.

If something goes wrong with your personal information, or you have questions about how we use it, please contact Miss Anna Bowden (Data Protection Officer)

If we have not been able to deal with your complaint, you can also contact the [Information Commissioner's Office](#)

Information Commissioner's Office
Wycliffe House,
Water Lane
Wilmslow, Cheshire SK9 5AF

Other rights

Individuals have rights regarding how their personal data is used and kept safe, including the right to:

- Object to the use of personal data if it would cause, or is causing, damage or distress
- Prevent it being used to send direct marketing
- Object to decisions being taken by automated means (by a computer or machine, rather than by a person)
- In certain circumstances, have inaccurate personal data corrected, deleted or destroyed, or restrict processing
- Claim compensation for damages caused by a breach of the data protection regulations

To exercise any of these rights, please contact our data protection officer.

Complaints

We take any complaints about our collection and use of personal information very seriously.

If you think that our collection or use of personal information is unfair, misleading or inappropriate, or have any other concern about our data processing, please raise this with us in the first instance.

To make a complaint, please contact our data protection officer.

Alternatively, you can make a complaint to the Information Commissioner's Office:

- Report a concern online at <https://ico.org.uk/concerns/>
- Call 0303 123 1113
- Or write to: Information Commissioner's Office, Wycliffe House, Water Lane, Wilmslow, Cheshire, SK9 5AF

Contact us

If you have any questions, concerns or would like more information about anything mentioned in this privacy notice, please contact our data protection officer:

Appendix 3 - Glossary

GDPR - The General Data Protection Regulation. These are new European-wide rules that are the basis of data protection legislation. They are enforced in the UK by the ICO.

Data Protection Act 1998: Now superseded by GDPR

All personal data which is held must be processed and retained in accordance with the eight principles of the Act and with the rights of the individual. Personal data must not be kept longer than is necessary (this may be affected by the requirements of other Acts in relation to financial data or personal data disclosed to Government departments). Retention of personal data must take account of the Act, and personal data must be disposed of as confidential waste. Covers both personal data relating to employees and to members of the public.

ICO:

The Information Commissioner's Office. This is a government body that regulates the Data Protection Act and GDPR

The ICO website is here <http://ico.org.uk/>

Data Protection Act 1998: Compliance Advice. Subject access – Right of access to education records in England:

General information note from the Information Commissioner on access to education records. Includes timescale (15 days) and photocopy costs.

Data Protection Act 1998: Compliance Advice. Disclosure of examination results by schools to the media:

General information note from the Information Commissioner on publication of examination results.

Education Act 1996:

Section 509 covers retention of home to school transport appeal papers. (By LA)

Education (Pupil Information) (England) Regulations 2005:

Retention of Pupil records

Health and Safety at Work Act 1974 & Health and Safety at Work Act 1972: Retention requirements for a range of health and safety documentation including accident books, H&S manuals etc.

School Standards and Framework Act 1998:

Retention of school admission and exclusion appeal papers and other pupil records.

Appendix 4 - Check Sheet

Schools may find it beneficial to use this to check their systems for handling data.

- Data protection Officer in place
- Information asset log complete
- School able to demonstrate compliance with GDPR
- Training for staff on Data Protection, and how to comply with requirements
- Data Protection Policy in place
- All portable devices containing personal data are encrypted
- Passwords – Staff use complex passwords
- Passwords – Not shared between staff
- Privacy notice sent to parents/pupils aged 13 or over
- Privacy notice given to staff
- Images stored securely
- School registered with the ICO as a data controller
- Systems in place to ensure that data is retained securely for the required amount of time
- Process in place to allow for subject access requests
- If school has CCTV, appropriate policies are in place to cover use, storage and deletion of the data, and appropriate signage is displayed
- Paper based documents secure
- Electronic backup of data both working and secure
- Systems in place to help reduce the risk of a data breach e.g. *personal data sent out checked before the envelope sealed, uploads to websites checked etc*

Appendix 5 – Potential Data Breach Procedure

Policy Statement

1. Schools are responsible for large amounts of personal and sensitive data. Every care is taken to protect personal data and to avoid a data protection breach. In the unlikely event of data being lost or shared inappropriately, it is imperative that the appropriate action is taken to minimise any associated risk as soon as possible.

Purpose

2. This policy sets out the procedure to be followed by school staff and governors when a potential data protection breach takes place. It sets out the decision process by which a potential breach is logged, investigated and a breach determined. The final stages are to decide whether notification of a breach to either the data subjects or the ICO is necessary.

Scope

3. This procedure applies to all personal and sensitive personal data held by the school.

Definitions

Data	A collection of facts from which conclusions may be drawn.
Personal data (as defined by the Data Protection Act 1998)	Data that relates to a living individual who can be identified from that data, or from that data and other information that comes into the possession of the Data Controller. For example: <ul style="list-style-type: none">▪ Name▪ Address and postcode▪ Date of birth
Special Category Data (Formerly Sensitive Data)	Personal data consisting of: <ul style="list-style-type: none">▪ Racial or ethnic origin▪ Political opinions▪ Religious or similar beliefs▪ Trade union membership▪ Physical or mental health or condition▪ Sexual life▪ Genetic or Biometric Data
Data Controller	A person or organisation that determines the purposes for which, and the manner in which, personal information is to be processed. The school should be registered as a Data Controller.

DPA	Data Protection Act 1998
Data Processor	A person who processes personal information on a data controller's behalf. Anyone responsible for the disposal of confidential waste is also included under this definition. A school employee is not a data processor.
Data Subject	The living individual who is the subject of the data/personal information.
GDPR	General Data Protection Regulation (new European legislation that will supersede the DPA)
LADO	Local Authority Designated Officer
Potential Data Breach	The potential loss, theft, corruption, inappropriate access or sharing of personal, or sensitive personal data.
Phishing / blagging	The act of tricking someone into giving out confidential information.
DCC	Durham County Council.
ICO	Information Commissioner's Office The ICO is the UK's independent public body set up to promote access to official information and protect personal information by promoting good practice, ruling on eligible complaints, providing information to individuals and organisations, and taking appropriate action when the law is broken.
Ransomware	Illegal software that encrypts users' data, then holds the school to ransom demanding payment of hundreds of pounds to provide the password.
Schedule 2 conditions (as amended by the GDPR) that may be relevant:	<ul style="list-style-type: none"> (i) consent (ii) needed for contractual performance (iii) needed to comply with legal obligations (iv) needed to protect vital interests (v) needed to perform a task in the public interest or in the exercise of official authority
Schedule 3 conditions (as amended by the GDPR) that may be relevant:	<ul style="list-style-type: none"> (i) explicit consent (ii) necessary processing by an employer (iii) to protect vital interests (iv) where the data has been manifestly made public by the subject (v) necessary for judicial proceedings

	(vi) necessary for substantial public interest reasons (vii) necessary health processing (viii) necessary for archiving purposes
Actionfraud	http://www.actionfraud.police.uk/ National cybercrime reporting centre.
ICT School Services	ICTSS 03000 261100

Legal Context

4. The [Data Protection Act](#) regulates the processing (use) of information relating to living individuals, including the obtaining, holding, use or disclosure of such information.
5. Principle 7 of the Data Protection Act 1998 states that organisations which process personal data must take “appropriate technical and organisational measures against the unauthorised or unlawful processing of personal data and against accidental loss or destruction of, or damage to, personal data”.

What is a potential data breach?

6. A potential data breach occurs, in general, when the Data Protection Act is not complied with in the processing of personal information. What this means is that the failure to comply with any of the 8 data protection principles can be considered a breach. The 8 data protection principles are as follows:
 - Personal data shall be processed fairly and lawfully and, in particular, shall not be processed unless
 - a. at least one of the conditions in Schedule 2 is met, and
 - b. in the case of sensitive personal data, at least one of the conditions in Schedule 3 is also met and the processing is proportionate to the aim pursued and respects the essence of data protection rights.
 - Personal data shall be obtained only for one or more specified and lawful purposes, and shall not be further processed in any manner incompatible with that purpose or those purposes.
 - Personal data shall be adequate, relevant and not excessive in relation to the purpose or purposes for which they are processed.
 - Personal data shall be accurate and, where necessary, kept up to date.
 - Personal data processed for any purpose or purposes shall not be kept for longer than is necessary for that purpose or those purposes.
 - Personal data shall be processed in accordance with the rights of data subjects under this Act.

- Appropriate technical and organisational measures shall be taken against unauthorised or unlawful processing of personal data and against accidental loss or destruction of, or damage to, personal data.
 - Personal data shall not be transferred to a country or territory outside the European Economic Area unless that country or territory ensures an adequate level of protection for the rights and freedoms of data subjects in relation to the processing of personal data.
7. This Data Breach Procedure aims to ensure that the school fulfils the seventh Data Protection Principle and takes appropriate technical and organisational measures against unauthorised or unlawful processing of personal data and against accidental loss or destruction of, or damage to, personal data.
8. A potential data security breach can happen for a number of reasons:
- Loss or theft of data or equipment on which data is stored
 - Accidentally sharing data with someone who does not have a right to know this information
 - Inappropriate access controls allowing unauthorised use
 - Equipment failure
 - Human error resulting in data being shared with someone who does not have a right to know
 - Hacking attack
 - 'Blagging' offences where information is obtained by deceiving the school to disclose personal information.

Examples of these include:

- The loss or theft of all or part of a service user's personal information, containing identifying information and/or details of their current personal circumstances.
 - Sharing of personal and/or sensitive service user information when consent has not been given and there is no legal basis to override this. Or more information is sent than is required. For example, if you send a whole medical file when a sickness absence form is all that is needed.
 - Emailing service user personal and/or sensitive personal information outside the school without appropriate security encryption measures in place. For example, if you send a case review notes record over an unsecured email system.
9. The list is indicative but not exhaustive. If you are, in any way, unsure whether or not a potential breach has taken place, legal advice may be sought. Many schools have a legal SLA which may cover appropriate advice.

What about an Information Communication Technology (ICT) breach?

10. If a potential breach involves an ICT device or service, such as a lost laptop, an errant email or a stolen USB stick, then technical advice should be sought from your ICT service provider.

Mandatory Procedures

11. When a potential breach has occurred, the school will need to investigate it to determine if an actual breach has occurred. In that process, there are four steps to manage and investigate a potential breach. They are:

- Reporting
- Containment and Recovery
- Investigating/Managing
- Evaluation and response

12. For each stage, there is a **key decision**. The following steps set out the decision process at each stage. (See also the flowchart at end of this document.)

13. The report template is included at the end of the document to help staff identifying and manage potential breaches.

Reporting the Potential Data Breach

Responsible Officer: Headteacher / Data Protection Officer

14. The first decision stage is to determine whether a potential breach has occurred. If you discover an incident that meets the criteria set out earlier (i.e. breaches any of the criteria set out at paragraph 6 above), you need to start this process.

15. Keep a log of all potential and investigated breaches. The log can then be analysed to ensure that any lessons learnt from breaches can be implemented.

16. Record the following in the log if known:

- a) Date of incident
- b) Date you were made aware of the potential breach
- c) Location of incident
- d) Nature of incident, that is, is it a loss, theft, disposal, unauthorised disclosure?
- e) Nature of data involved, list all data elements. For example, whether it is names, files, dates of birth, or reference numbers
- f) What security protection was on the data? Is it protected by a password, encryption, or something else?
- g) Is there a back up of the data, if so where?

- h) Number of people potentially affected, an estimate should be provided if no precise figure can be given.
- i) Details of any steps taken to retrieve data or to contain the breach if it involved unauthorised access or potentially compromised security.

Note: If the incident involves the theft, for example, of a bag containing personal documents or a laptop, the theft must be reported to the Police.

Containment and Recovery

Responsible Officer: Headteacher / Data Protection Officer

- 17.** The **second decision stage** is to consider whether the potential breach needs an investigation template or whether it can be contained within the school or DCC services. The focus is on whether the potential breach has been contained. If so, this will be logged as a **near miss** and no further action will be taken.
- 18.** The reasons behind the near miss will be analysed and any trends or learning outcomes will be shared across the services to prevent future breaches.

Worked example:

A teacher contacts the head to say that an envelope containing sensitive personal information about the medical condition of a pupil was given to the wrong Educational Psychologist. The envelope has not been opened and the school has been contacted by the Educational Psychology Service. The school will need to collect the envelope to secure the information. In this instance the information was contained. This would be recorded as a 'near miss'.

- 19.** If the breach has not been contained then the school should follow the data breach investigation template. A copy of this template at the end of this document.
- 20.** The Headteacher will want to take steps to contain the potential breach. They will want to recover the information and they will need to inform their Chair of Governors.
- 21.** **If a pupil is potentially in danger from the breach, their safety is a priority and they must be protected. Follow safeguarding procedures. Once they are safe, then an investigation can commence.**

What are the criteria for deciding whether a potential breach requires an investigation?

22. The decision to investigate formally will depend mainly on whether the information has been disclosed and is uncontained. Both of these will also indicate the possible effect it will have on the people whose data has been disclosed. The following are some of the criteria that indicate when a potential breach needs further investigation and cannot be considered contained by the service:

- Sensitive personal information is disclosed to anyone who does not work for the school or LA and does not have a need to know.
- Sensitive personal information of pupils or staff is lost or stolen.
- Sensitive personal information, such as case review documentation, is emailed to several people who do work for the LA but who do not have a need to know.

Investigating the Potential Data Breach

Responsible Officer : Data protection officer / Headteacher / Chair of Governors

23. When a potential breach meets the criteria for further investigation, the school needs to investigate the loss and produce a short report. In general, the report needs to answer four interrelated questions.

- What caused or allowed the breach to occur?
- Do the people affected by the breach need to be informed?
- Does the ICO need to be notified?
- What are the lessons to be learned to avoid a similar breach in the future?

Worked example:

The school secretary reports that a child's assessment from the Educational Psychologist went to the wrong address. The person at the wrong address opened the assessment and read it. They contacted the school. This is a potential breach that needs to be investigated. It cannot be contained because the letter has been opened. If the letter had been collected before it had been opened, then it could be considered to have been contained. This needs further investigation, and may need to be referred to the ICO. The safety of the child should also be considered and additional safeguarding procedures may need to be followed.

24. A template for investigating data breaches is attached at the end of the document. The Root Cause Analysis model (RCA) is based upon the NHS's approach to investigating incidents.

25. Beyond the containment and recovery phase, the investigation may reveal that the people affected by the breach need to be informed. When the school decides to notify the affected persons, it should have a clear purpose, for example, to enable individuals who may have been affected to take steps to protect themselves. If there is a safeguarding concern identified, the school should immediately follow its safeguarding procedures, for example, if the identity of a looked after child

(LAC) at risk has been disclosed, this could affect the safety of the child and measures will need to be taken to protect the safety of the family. In extreme cases, for instance if a member of staff has lost or published personal data affecting children, it may be necessary to instigate disciplinary measures against the member of staff and consider referral to the LADO for further advice.

26. Please note: This decision is to tell the data subject so that they can take any steps they feel necessary to protect their personal information, such as from identity theft. This is not the formal notification of the ICO which is covered in the fourth decision stage following a formal data breach.
27. At the end of the investigation, the school may want to contact the data subject(s) and explain what went wrong and what has been done to fix it. A copy of the full data breach investigation report is not normally sent.
28. The investigation report will suggest whether the incident needs to be logged as a formal data breach.

Managing the Potential Breach

Responsible Officer: Headteacher / Data Protection Officer

29. Once a potential data breach report is completed the **third decision point** is reached. The decision now is whether the potential breach is to be logged as a formal data breach. **What are the criteria for recommending a formal data breach?**
30. The primary consideration will be the wellbeing of the people affected by the breach.
31. The following questions will help with making that decision.
 - What type of data is involved?
 - How sensitive is it? Is it sensitive because of its very personal nature (health records) or because of what might happen if it is misused (bank account details)?
 - What has happened to the data? If data has been stolen, could it be used to harm the individuals it relates to?
 - What does the data tell a third party about the individual? Is it only one detail about them, such as a telephone number, or does it include other details that could help a fraudster build a detailed picture?
 - How many people are affected?
 - Who are the people affected? For example, are they staff, customers, clients, suppliers, or vulnerable children and adults?
 - What harm can come to those individuals? Are there risks to physical safety or reputation, of financial loss or a combination of these and other aspects of their life?
32. The severity of any potential breach needs to be considered in terms of the sensitivity of the information and the number of people involved. The matrix [Table I] shows when a potential breach becomes an actual breach requiring further formal assessment. *The table is for guidance only*

and other circumstances may have to be considered.

33. The school should use Table I, below, when considering whether to recommend if a potential data breach investigation should result in the recording of a formal data breach.

Table I

Number of People involved	1000+					
	100					
	50					
	5					
	1					
		e.g. Name, address	e.g. National Insurance number	e.g. Bank details, medical information	e.g. Details of a vulnerable child.	e.g Full medical files or criminal file
Sensitivity of the Information						
Key	Unlikely to require recommending as a formal breach		Consideration should be given to recommending as a formal breach		Likely to require recommending as a formal breach	

34. The table is only a guide. **The risk of harm to the individuals involved should be considered as the determining factor.**

Worked example:

Here is a worked example to understand the difference between a near miss, a potential breach and a formal data breach. The formal data breach requires recording on the formal data breach log. All breaches start as potential breaches and then are recorded as near miss, potential breach, or formal breach.

Near Miss

Some data security breaches will not lead to risks beyond inconvenience to those who need the data to do their job. For example, a damaged laptop where the files are backed up and can be recovered, has a lower level of risk and can be recovered and managed by the school. This has to be investigated as potential breach. As the information can be recovered or reconstructed and the information is not in the public domain, then the data subjects would not have suffered damage or distress. It would be logged as a **near miss**. An apology would not need to be sent.

Potential data breach

If the data cannot be recovered and it will have an effect on the data subject because the school has to reconstruct the data set. Even though the data is not in the public domain, it would be investigated and logged as a potential breach. The investigation should reveal why the data was stored in such a way it could become corrupted and was not recoverable. If the data subject was not affected directly by the breach, then they would not need to be informed. If they were affected, such as a missed appointment as a result, then they would need an apology.

Formal data breach

A spreadsheet with the medical assessments including psychological assessments of vulnerable children was emailed to 400 taxi firms. The breach cannot be contained. It involves sensitive information of more than 5 people. This would require an investigation.

The investigation should recommend it be logged as a formal data breach based on the amount of information, that it was in the public domain, the sensitivity of the information and the potential harm to the children. The harm to the individuals would be greater because their information was in the public domain. An apology would need to be issued. This would need to be logged as a formal breach and the school would need to consider whether it will inform the ICO.

Final Evaluation and Response

Responsible Officer: Headteacher / Data protection officer / Chair of Governors

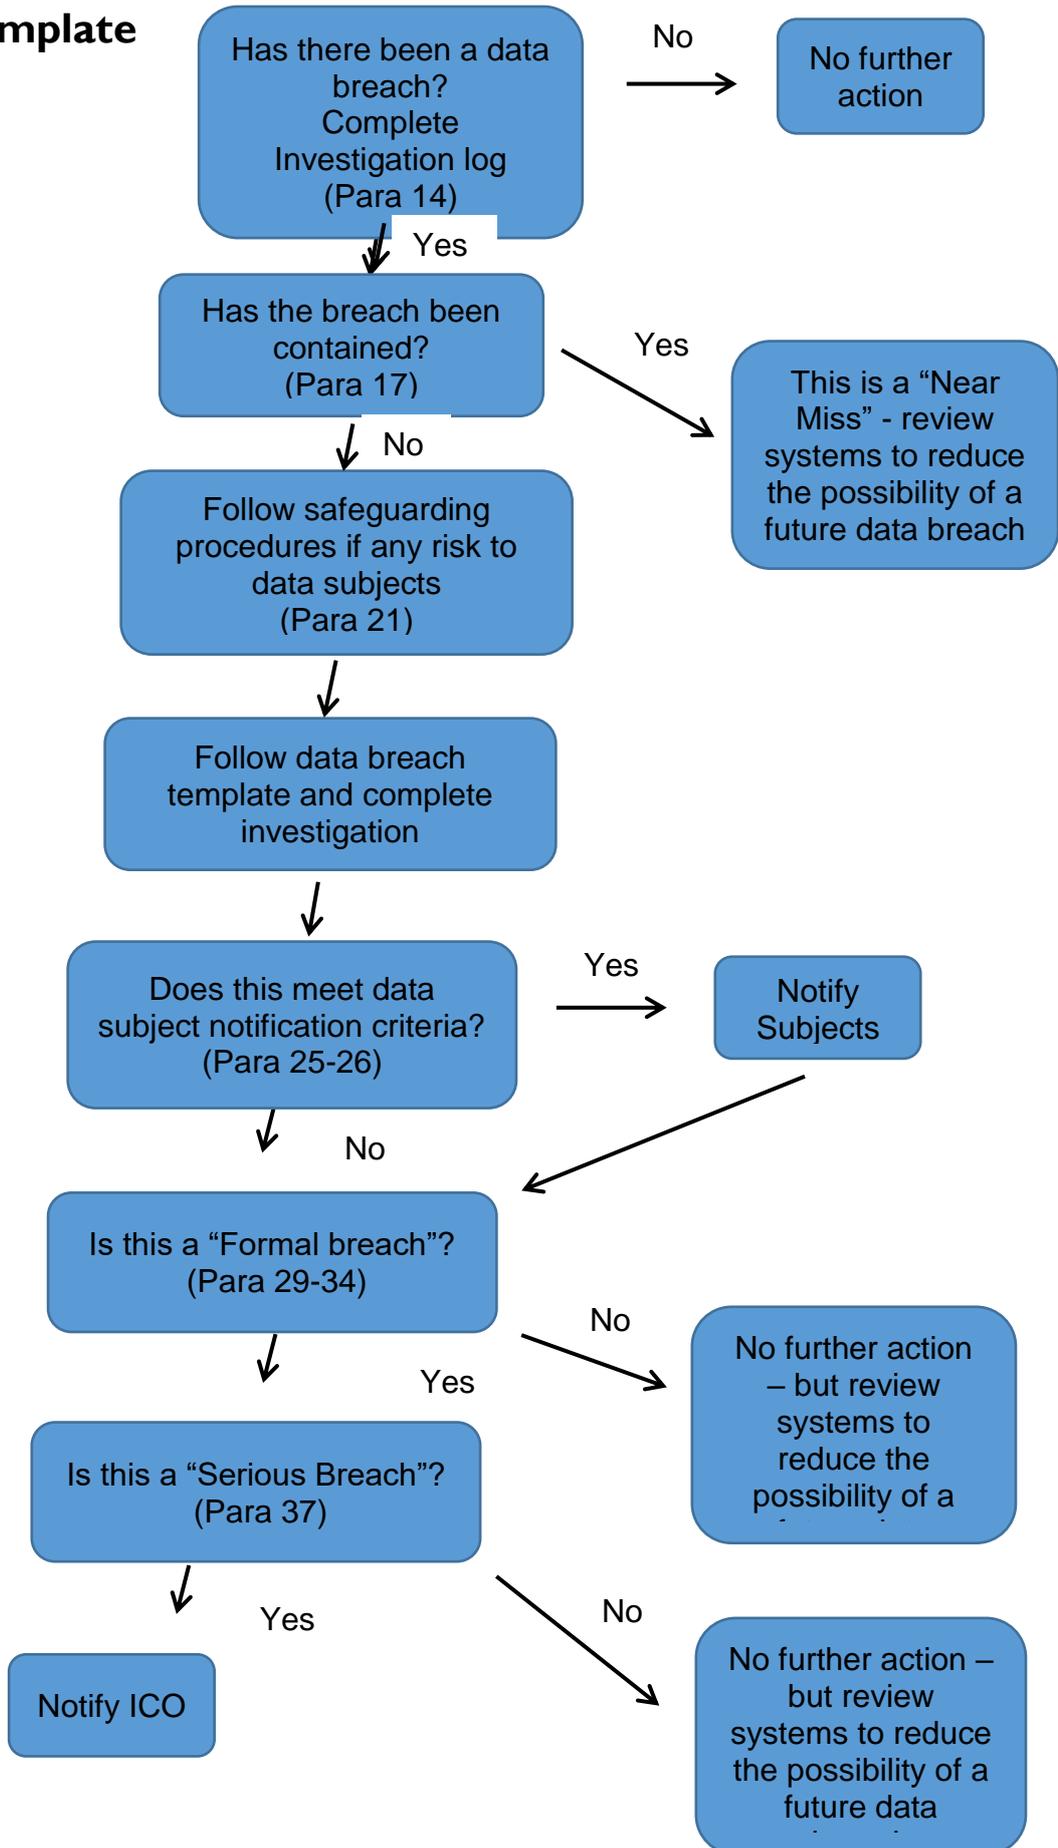

35. The final evaluation process is done by the Head and Governing Body to consider the causes of the breach and the lessons that need to be learned. The investigation report indicates how effective the school was in response to the breach. The school should also seek advice from the School and Governor Support Service.
36. The school should implement any actions highlighted by the report.

Formal Notification of Breaches

Responsible Officer: Headteacher / Chair of Governors

37. The **fourth decision stage** is whether the data breach was severe enough to require the school to inform the Information Commissioner's Office. The decision to notify the ICO will be made by the school with additional advice from the School and Governor Support Service.
Please note that this decision stage is different from notifying a data subject of the data breach.

Breach Template

Data Breach Investigation Report Template

Root Cause Analysis (RCA) - Investigation Report Template – Guidance.

(Please read – instruction for use of this RCA report template)

Write your investigation report in the right hand column (column B)

To help in writing the report, refer to summary guidance in column A.
Additional help can be found in the ‘Guide to RCA investigation report writing’.

If, when you are carrying out your investigation, there is no information against a heading, please explain why this is the case. (For example, if you do not know the date of an incident, but only the date it was reported, then leave the incident date blank and explain the date is not known.)

If issues arise which require a new heading this can be added as a new row.

Once you have completed column B, you need to delete column A. * All that is required is column B*

First, delete all guidance both here and in the template below.

A copy of this report will need to be retained in the school and may be needed by other agencies (Police, ICO, Legal Team) in assisting the school in dealing with the consequences of the breach.

Column A	Column B
Quick reference guide	Type your investigation report in this column
Incident Date	Add date
Incident Number Author(s) / Investigating Officer	Add your number Name of person
Report Date	Date
Incident description and consequences (Concise incident description, including number of data subjects.)	The personal information of 25 vulnerable children were disclosed when an email was sent to external transport list rather than an internal transport list.
Information Recovered	Yes or No.
Decision as to whether those individuals whose data has been breached and are to be notified.	<i>Example only (please delete and add your own findings)</i> The 25 people included bank details. The individuals concerned have been notified to allow them to be vigilant for any suspicious activity on their account.
Chronology of events (For complex cases any summary timeline included in the report should be a summary.)	The key points of the event: when discovered, when last use of data, when authority notified, when information recovered if recovered, when data subject informed of risk etc.
Contributory factors (A list of significant contributory facts.)	Over the years email addresses had been added, causing the team to lose track of the internal and external lists.
Root Causes (These are the most fundamental underlying factors contributing to the incident that can be addressed. Root causes should be meaningful (not sound bites such as communication failure) and there be a clear link, by analysis, between root CAUSE and EFFECT.)	Staff involved have not had training on use of internal and external lists. Internal and external lists have names that are only different by one letter. There is no procedure for creating distributions lists to be used by service.
Lessons learned (Key issues identified which may not have contributed to this incident but from which others can learn.)	The external lists should be marked clearly and consistently as external.
Type of breach	Please tick one of the following: Near miss <input type="checkbox"/> Potential breach <input type="checkbox"/> Further action: <input type="checkbox"/>

	<p><i>please provide details</i></p> <p><input type="checkbox"/></p> <p><input type="checkbox"/></p> <p>No further actions Formal breach</p>
<p>Recommendations (Numbered and referenced) Recommendations should be directly linked to root causes and lessons learned. They should be clear but not detailed. (Detail belongs in the action plan.) It is generally agreed that key recommendations should be kept to a minimum wherever possible. All recommendations are to be Specific, Measurable, Achievable, Realistic and Timely. – SMART.</p>	<p>Ensure all email lists are reviewed so that external lists are clearly marked. All staff are instructed about the use of external email lists.</p>
<p>Arrangements for shared learning (Describe how learning has been or will be shared with staff and other organisations.)</p> <p>Outcome (The conclusion of the investigation should state whether the author believes the breach should be logged formally or not.)</p>	<p><i>Example only (please delete and add your own findings)</i></p> <ul style="list-style-type: none"> • Share findings with other schools sharing similar activities. • Share findings to identify opportunities for sharing outside the organisation. <p><i>Example only (please delete and add your own findings)</i> As the breach resulted in sensitive personal information being inappropriately shared with more than 10 people, it is recommended that this be recorded as a formal data breach.</p>
<p>Headteacher and Chair of Governors</p> <p>Date</p>
